PROFESSIONAL SUMMARY

Passionate and detail-oriented Full-Stack Developer with strong experience in modern JavaScript frameworks, PHP, and scalable database architectures. Skilled in building high-quality, responsive, and performant web applications using Next.js, Nuxt.js, NestJS, PostgreSQL, and Prisma ORM, alongside traditional stacks like PHP and MySQL.

Specializes in crafting modern user interfaces with Tailwind CSS and developing secure, scalable backend systems. Proven ability to deliver complete end-to-end solutions—from business platforms to AI-powered applications—balancing excellent user experience with robust architecture.

TECHNICAL SKILLS

Frontend:

HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind CSS, React, Next.js, Vue.js, Nuxt.js

Backend:

PHP (Core & OOP), Node.js, NestJS, Python (Flask basics), Go (basic)

Database & ORM:

MySQL, MS SQL Server, PostgreSQL, Prisma ORM

Tools & Platforms:

Git, VS Code, XAMPP, Docker (basic), REST APIs, JSON, JWT Authentication

Other:

Responsive Design, Authentication Systems, CRUD Operations, MVC Architecture, SQL Optimization, Real-time Features

PROJECTS

NexaMart – Full-Stack E-commerce Platform

Tech Stack: Next.js 14, NestJS, PostgreSQL, Prisma ORM, Tailwind CSS, Stripe

- Built a production-ready e-commerce system with authentication, cart, and order management
 - Developed RESTful APIs using NestJS and Prisma for type-safe database access
 - Integrated Stripe payments and admin dashboard for inventory management
-

CreatorsHub – Social Content Platform

Tech Stack: Nuxt.js 3, NestJS, PostgreSQL, Prisma, WebSockets

- Developed a real-time content platform with notifications and user interactions
 - Implemented SSR for SEO optimization
 - Built scalable backend with microservices and JWT-based authentication
-

InsightAI – Analytics Dashboard

Tech Stack: Next.js, Prisma, PostgreSQL, Chart.js, OpenAI API

- Built AI-powered dashboard for business insights and KPI tracking
 - Implemented complex data aggregation queries
 - Integrated predictive analytics and visualization tools
-

Study Plan Management System

Tech Stack: PHP, MySQL, Tailwind CSS

- Multi-user system for tracking exams, milestones, and study schedules
 - Included countdown timers, progress tracking, and dashboards
 - Implemented secure authentication and role-based access
-

Food Recipe Website

Tech Stack: Vue.js, Nuxt.js, Go, PostgreSQL, JWT

- Developed a recipe-sharing platform with likes, comments, and ratings
- Built high-performance REST API using Go

- Implemented full-text search and secure authentication
-

Hospital Appointment System

Tech Stack: PHP, JavaScript, MySQL, Tailwind CSS

- Designed booking system with doctor availability and scheduling
 - Built multi-role dashboards (patients, doctors, admins)
 - Integrated notification system for reminders
-

E-commerce Website

Tech Stack: PHP, JavaScript, MySQL

- Developed shopping platform with cart and secure checkout
 - Implemented session-based cart system
 - Created admin panel for inventory and sales tracking
-

AI-Powered Customer Support Chatbot

Tech Stack: Python, JavaScript, OpenAI API

- Built intelligent chatbot with context-aware responses
 - Integrated REST API for web platform usage
 - Designed system to improve accuracy over time
-

Class Scheduling Management System

Tech Stack: C#, .NET, SQL Server

- Automated scheduling system with conflict resolution
 - Implemented real-time notifications and announcements
 - Designed dynamic timetable generation system
-

Tesla Clone App

Tech Stack: React Native, Redux

- Developed mobile app with vehicle configuration and booking flow
- Built smooth UI animations and responsive layouts

Event Planner System

Tech Stack: PHP, MySQL

- Created platform for managing events, vendors, and clients
- Integrated calendar and automated reminders

Cupcake Inventory System

Tech Stack: PHP, MySQL

- Built inventory system with real-time stock tracking
- Implemented automatic stock deduction and reporting
- Added low-stock alerts and supplier management

Social Security Number Management System

Tech Stack: Java AWT, Swing, MS SQL Server

- Desktop application for secure ID management
- Built admin panel with search, update, and reporting features

EDUCATION

BSc in Computer Science

Hilcoe School of Computer Science and Technology

3rd-Year Student (Expected Graduation: 2026)

STRENGTHS & APPROACH

- **Problem Solver:** Strong debugging and system design skills
 - **Full-Stack Mindset:** Bridges frontend UX with backend architecture
 - **Fast Learner:** Quickly adapts to new technologies
 - **Communication:** Clear, proactive, and remote-friendly
 - **Code Quality:** Focus on clean, scalable, maintainable code
-

AVAILABILITY

- Full-time / Part-time Remote
 - Flexible hourly rate based on project scope
-
